## — SELO BFB-SERIES

*Standard solutions with customized services and recipe development*

### Specifications

- Full vacuum cooking vessel
- Heating via double jacket
- Anchor stirrer
- Homogenizer
- Control Unit with HMI including recipe control
- Hygienic design (EHEDG)
- Skid mounted

### Features & Benefits

- Homogeneous end product
- Wide range of ingredients can be used
- Optimal batch time due to high evaporation capacity
- Recipes with flexible number of process steps
- Recipe control via HMI
- Quick change over and low waste at recipe change due to compact design
- Ease of operation and easy maintainable
- CIP prepared
- Optimal Return On Investment

### Options

The batch process system can be extended with the following options, so that the equipment can match your exact requirements:

- Pre-mix vessel
- Direct Steam injection
- Product buffer tank
- Column loader
- CIP (external or CIP in CIP)
- Just-In-Time adding of ingredients
- Metal detection
- Recipe development
- Technical & operator training
